Subject: Meeting with EPA on the 11th is scheduled for 10:30-12:00 at the Port

After hearing from Boeing, we are scheduled to meet with EPA/Ecology at 10:30-12:00 at the Port of Seattle (Doug, can you get us a room?). Allison requested that just the managers and technical leads attend this meeting. However, after talking to Rick Huey from Ecology, it is not certain that Jim Pendowski will be able to attend.

EPA, as I said yesterday, wants to discuss the schedule. We of course want to discuss the process. Rick might provide more insight to Ecology's role in the process, which from my understanding of what he said is to focus on source control and have less involvement in the RI. He said Ecology and EPA are close to drafting an MOA, and if possible they will bring it to the meeting.

If you have any questions feel free to give me a call (684-7686)

Also, the meeting that EPA is holding with ECOSS on the impacts of the Superfund listing is December 6 at 7:30-9:30 at the Aerospace Union Hall, 9135 15 Pl (large brick building). I am planning to attend this with maybe one or two folks from SPU. I am not sure all our specific questions will be addressed here. Allison and Rick are planning to attend, and probably someone from the Corps, but no one from L&I. Rick has talked to them and can give us their read on health and safety issues - basically it is to continue whatever we are doing now, there will be no new requirements at this time. They may revisit this position once we have more information on the level of risk associated with particular sites.

Finally, suggestions for meeting times for a January meeting of the LDWG managers - afternoon of Thursday January 10, or Friday 11th, Monday 14th or Tuesday 15. Let me know your preference.
